St. Dominic School Wellness Policy

Preamble

St. Dominic School (here to referred to as the District) is committed to the optimal development of every student. The District believes that for students to have the opportunity to achieve personal, academic, developmental and social success, we need to create positive, safe and health-promoting learning environments at every level, in every setting, throughout the school year. Research shows that two components, good nutrition and physical activity before, during and after the school day, are strongly correlated with positive student outcomes. For example, student participation in the U.S. Department of Agriculture's (USDA) School Breakfast Program is associated with higher grades and standardized test scores, lower absenteeism and better performance on cognitive tasks.i,ii,iii,iv,v,vi,vii Conversely, less-than-adequate consumption of specific foods including fruits, vegetables and dairy products, is associated with lower grades among students.viii,ix,x In addition, students who are physically active through active transport to and from school, recess, physical activity breaks, high-quality physical education and extracurricular activities – do better academically.xi,xii,xiii,xiv. Finally, there is evidence that adequate hydration is associated with better cognitive performance.^{15,16,17}

This policy outlines the District's approach to ensuring environments and opportunities for all students to practice healthy eating and physical activity behaviors throughout the school day while minimizing commercial distractions. Specifically, this policy establishes goals and procedures to ensure that:

- Students in the District have access to healthy foods throughout the school day – both through reimbursable school meals and other foods available throughout the school campus– in accordance with Federal and state nutrition standards;
- Students receive quality nutrition education that helps them develop lifelong healthy eating behaviors;
- Students have opportunities to be physically active before, during and after school;
- Schools engage in nutrition and physical activity promotion and other activities that promote student wellness;
- School staff are encouraged and supported to practice healthy nutrition and physical activity behaviors in and out of school;
- The community is engaged in supporting the work of the District in creating continuity between school and other settings for students and staff to practice lifelong healthy habits; and

- The District establishes and maintains an infrastructure for management, oversight, implementation, communication about and monitoring of the policy and its established goals and objectives.

This policy applies to all students, staff and schools in the District. Specific measurable goals and outcomes are identified within each section below.

- The District will coordinate the wellness policy with other aspects of school management, including the District's School Improvement Plan, when appropriate.
- NOTE: Will also include any relevant data or statistics from state or local sources supporting the need for establishing and achieving the goals in this policy

I. School Wellness Committee

Committee Role and Membership

The School will convene a representative School wellness committee (hereto referred to as the SWC or work within an existing school health committee) that meets in August each year to establish goals for and oversee school health and safety policies and programs, including development, implementation and periodic review and update of this district-level wellness policy (heretofore referred as "wellness policy").

The SWC membership will represent all school levels (preschool-grade 8) and include (to the extent possible), but not be limited to: parents and caregivers; students; representatives of the school nutrition program and physical education teacher and school health professional.

Leadership

The Principal or designee(s) will convene the SWC and facilitate development of and updates to the wellness policy, and will ensure each school's compliance with the policy. The designated official for oversight is the Principal, St. Dominic School, 507-645-8136.

The name(s), title(s), and contact information (email address is sufficient) of this/these individual(s) is(are):

Name	Title / Relationship to the School or District	Email address	Role on Committee
Shawn Dudley	Principal	shawndudley@schoolofstdominic.org	Assists in the evaluation of the wellness policy implementation
Mary Lazaro-Hefer	Kitchen Manager	kitchen@schoolofstdominic.org	Assists in the evaluation of the wellness policy implementation
Nick Bornhauser	Physical Education Teacher (Preschool-8th Grade)	nickbornhauser@schoolofstdominic.org	Assists in the evaluation of the wellness policy implementation
Andrea Redder	Preschool Teacher	andreadredder@schoolofstdominic.org	Assists in the evaluation of the wellness policy implementation
Sam Shimota	School Health Para	nurse@schoolofstdominic.org	Assists in the evaluation of the wellness policy implementation

Each school will designate a school wellness policy coordinator, who will ensure compliance with the policy. Refer to Appendix A for a list of school-level wellness policy coordinators.

II. Wellness Policy Implementation, Monitoring, Accountability and Community Engagement

Implementation Plan

The School will develop and maintain a plan for implementation to manage and coordinate the execution of this wellness policy. The plan delineates roles, responsibilities, actions and timelines specific to each school; and includes

information about who will be responsible to make what change, by how much, where and when; as well as specific goals and objectives for nutrition standards for all foods and beverages available on the school campus, food and beverage marketing, nutrition promotion and education, physical activity, physical education and other school-based activities that promote student wellness. It is recommended that the school use the Healthy Schools Program online tools to complete a school-level assessment based on the Centers for Disease Control and Prevention's School Health Index, create an action plan that fosters implementation and generate an annual progress report.

This wellness policy and the progress reports can be found at:
schoolofstdominic.org.

Recordkeeping

The School will retain records to document compliance with the requirements of the wellness policy at the school office and/or on the school's computer network.

Documentation maintained in this location will include but will not be limited to:

- The written wellness policy;
- Documentation demonstrating that the policy has been made available to the public;
- Documentation of efforts to review and update the School Wellness Policy; including an indication of who is involved in the update and methods the district uses to make stakeholders aware of their ability to participate on the DWC;
- Documentation to demonstrate compliance with the annual public notification requirements;
- The most recent assessment on the implementation of the local school wellness policy;
- Documentation demonstrating the most recent assessment on the implementation of the School Wellness Policy has been made available to the public.

Annual Notification of Policy

The School will actively inform families and the public each year of basic information about this policy, including its content, any updates to the policy and implementation status. The School will make this information available via the district website and/or district-wide communications. The School will provide as much information as possible about the school nutrition environment. This will include a summary of the school's events or activities related to wellness policy implementation. Annually, the School will also publicize the name and contact

information of the school officials leading and coordinating the committee, as well as information on how the public can get involved with the school wellness committee.

Triennial Progress Assessments

At least once every three years, the School will evaluate compliance with the wellness policy to assess the implementation of the policy and include:

- The extent to which schools under the jurisdiction of the School are in compliance with the wellness policy;
- The extent to which the School's wellness policy compares to the Alliance for a Healthier Generation's model wellness policy; and
- A description of the progress made in attaining the goals of the School's wellness policy.

The position/person responsible for managing the triennial assessment and contact information is Shawn Dudley, Principal, 507-645-8136.

The SWC, in collaboration with individual schools, will monitor schools' compliance with this wellness policy.

St. Dominic School will actively notify households/families of the availability of the triennial progress report.

Revisions and Updating the Policy

The SWC will update or modify the wellness policy based on the results of the annual School Health Index and triennial assessments and/or as School priorities change; community needs change; wellness goals are met; new health science, information, and technology emerges; and new Federal or state guidance or standards are issued. The wellness policy will be assessed and updated as indicated at least every three years, following the triennial assessment.

Community Involvement, Outreach, and Communications

The School is committed to being responsive to community input, which begins with awareness of the wellness policy. The School will actively communicate ways in which representatives of SWC and others can participate in the development, implementation and periodic review and update of the wellness policy through a variety of means appropriate for that district. The School will also inform parents of the improvements that have been made to school meals and compliance with school meal standards, availability of child nutrition programs and how to apply, and a description of and compliance with Smart Snacks in School nutrition

standards. The School will use electronic mechanisms, such as email or displaying notices on the district's website, as well as non-electronic mechanisms, such as newsletters, presentations to parents, or sending information home to parents, to ensure that all families are actively notified of the content of, implementation of, and updates to the wellness policy, as well as how to get involved and support the policy. The School will ensure that communications are culturally and linguistically appropriate to the community, and accomplished through means similar to other ways that the district and individual schools are communicating important school information with parents.

The School will actively notify the public about the content of or any updates to the wellness policy annually, at a minimum. The District will also use these mechanisms to inform the community about the availability of the annual and triennial reports.

III. Nutrition

School Meals & Snacks

Our school is committed to serving healthy meals to children, with plenty of fruits, vegetables, whole grains, fat-free and low-fat milk; that are moderate in sodium, low in saturated fat, and have zero grams trans fat per serving (nutrition label or manufacturer's specification); and to meeting the nutrition needs of school children within their calorie requirements. The school meal programs aim to improve the diet and health of school children, help mitigate childhood obesity, model healthy eating to support the development of lifelong healthy eating patterns and support healthy choices while accommodating cultural food preferences and special dietary needs.

Our school participates in USDA child nutrition programs, including the National School Lunch Program (NSLP), the Child and Adult Care Food Program (CACFP) and Smart Snacks. Our school is committed to offering school meals through the NSLP, CACFP and Smart Snacks programs, and other applicable Federal child nutrition programs, that:

- Are accessible to all students;
- Are appealing and attractive to children;
- Are served in clean and pleasant settings;
- Meet or exceed current nutrition requirements established by local, state, and Federal statutes and regulations. (The school offers reimbursable school meals that meet USDA nutrition standards.)
- Only Smart Snacks approved items will be served at after school care (St. Watch).
- Snack Cart will only serve Smart Snack approved snacks, and always have fruit and vegetable options available.

- Promote healthy food and beverage choices using at least ten of the following Smarter Lunchroom techniques:
 - Fresh fruit is available daily.
 - Daily fruit options are displayed in a location in the line of sight and reach of students.
 - All staff members, especially those serving, have been trained to politely prompt students to select and consume the daily vegetable options with their meal.
 - Student surveys and taste testing opportunities are used to inform menu development, dining space decor and promotional ideas.
 - Student artwork is displayed in the service and/or dining areas
 - Daily announcements are used to promote and market menu options. Menus will be posted on the school website.
 - Students will be allowed at least 20 minutes to eat lunch, counting from the time they have received their meal and are seated (meets Healthy Schools Program Gold-level criteria).
 - Students are served lunch at a reasonable and appropriate time of day.
 - Participation in Federal child nutrition programs will be promoted among students and families to help ensure that families know what programs are available in their children's school.

In grades K-8 Fat Free Chocolate Milk is only allowed or served with lunch. 1% and Skim Milk will be offered at Breakfast and available for purchase during students snack breaks. Preschool & Prekindergarten are only allowed 1% or Skim milk due the preschool meal pattern requirements.

Staff Qualifications and Professional Development

The Kitchen Manager and staff will meet or exceed hiring and annual continuing education/training requirements in the USDA professional standards for child nutrition professionals. These school nutrition personnel will refer to USDA's Professional Standards for School Nutrition Standards website to search for training that meets their learning needs.

Water

To promote hydration, free, safe, unflavored drinking water will be available to all students throughout the school day* and throughout every school campus* ("school campus" and "school day" are defined in the glossary). The school will make drinking water available where school meals are served during mealtimes.

- Water cups/jugs will be available in the cafeteria if a drinking fountain is not present.

- All water sources and containers will be maintained on a regular basis to ensure good hygiene and health safety standards. Such sources and containers may include drinking fountains, water jugs, hydration stations, water jets and other methods for delivering drinking water.]
- Students will be allowed to bring and carry (approved) water bottles filled with only water with them throughout the day.

Competitive Foods and Beverages

The school is committed to ensuring that all foods and beverages available to students on the school campus* during the school day* support healthy eating. The foods and beverages sold and served outside of the school meal programs (e.g., “competitive” foods and beverages) will meet the USDA Smart Snacks in School nutrition standards, at a minimum. Smart Snacks aim to improve student health and well-being, increase consumption of healthful foods during the school day and create an environment that reinforces the development of healthy eating habits. A summary of the standards and information, as well as a Guide to Smart Snacks in Schools are available at:

<http://www.fns.usda.gov/healthierschoolday/tools-schools-smart-snacks>.

The Alliance for a Healthier Generation provides a set of tools to assist with implementation of Smart Snacks available at

www.foodplanner.healthiergeneration.org.

To support healthy food choices and improve student health and well-being, all foods and beverages outside the reimbursable school meal programs that are sold to students on the school campus during the school day will meet or exceed the USDA Smart Snacks nutrition standards. These standards will apply in all locations and through all services where foods and beverages are sold, which may include, but are not limited to, à la carte options in cafeterias, vending machines, school stores and snack or food carts.

Celebrations and Rewards

All foods offered on the school campus will meet or exceed the USDA Smart Snacks in School nutrition standards including through:

1. Celebrations and parties- The district will provide a list of healthy party ideas to parents and teachers , including non-food celebration ideas. Healthy party ideas are available from the Alliance for a Healthier Generation and from the USDA.
2. Classroom snacks brought by parents- The School will provide to parents a

list of foods and beverages that meet Smart Snacks nutrition standards (see page 18 of wellness policy).

3. Rewards and incentives- The School will provide teachers and other relevant school staff a list of alternative ways to reward children. Foods and beverages will not be used as a reward, or withheld as punishment for any reason, such as for performance or behavior. [Meets Healthy Schools Program Silver-level criteria]

Fundraising

Foods and beverages that meet or exceed the USDA Smart Snacks in Schools nutrition standards may be sold through fundraisers on the school campus* during the school day*. The School will make available to parents and teachers a list of healthy fundraising ideas [examples from the Alliance for a Healthier Generation and the USDA].

Nutrition Promotion

Nutrition promotion and education positively influence lifelong eating behaviors by using evidence-based techniques and nutrition messages, and by creating food environments that encourage healthy nutrition choices and encourage participation in school meal programs. Students and staff will receive consistent nutrition messages throughout schools, classrooms, gymnasiums, and cafeterias. Nutrition promotion also includes marketing and advertising nutritious foods and beverages to students and is most effective when implemented consistently through a comprehensive and multi-channel approach by school staff, teachers, parents, students and the community.

The School will promote healthy food and beverage choices for all students throughout the school campus, as well as encourage participation in school meal programs. This promotion will occur through at least:

- Implementing at least ten or more evidence-based healthy food promotion techniques through the school meal programs using Smarter Lunchroom techniques; and
- Ensuring 100% of foods and beverages promoted to students meet the USDA Smart Snacks in School nutrition standards. Additional promotion techniques that the District and individual schools may use are available at <http://www.foodplanner.healthiergeneration.org/>.

Nutrition Education

The School will teach, model, encourage and support healthy eating by all students. Schools will provide nutrition education and engage in nutrition promotion that:

- Is designed to provide students with the knowledge and skills necessary to

promote and protect their health;

- Is part of not only health education classes, but also integrated into other classroom instruction through subjects such as math, science, language arts, social sciences and elective subjects;
- Includes enjoyable, developmentally-appropriate, culturally-relevant and participatory activities, such as cooking demonstrations or lessons, promotions, taste-testing, farm visits and school gardens;
- Promotes fruits, vegetables, whole-grain products, low-fat and fat-free dairy products and healthy food preparation methods;
- Emphasizes caloric balance between food intake and energy expenditure (promotes physical activity/exercise);
- Links with school meal programs, cafeteria nutrition promotion activities, school gardens, Farm to School programs, other school foods and nutrition-related community services;
- Teaches media literacy with an emphasis on food and beverage marketing; and
- Includes nutrition education training for teachers and other staff.

Essential Healthy Eating Topics in Health Education

The School will continue implementing a curriculum in grades K-4 regarding health and nutrition, and will continue to have health education in grades 5-8. The District will include in the health education curriculum a minimum of 12 of the following essential topics on healthy eating:

Relationship between healthy eating and personal health and disease prevention

- Food guidance from MyPlate
- Reading and using FDA's nutrition fact labels
- Eating a variety of foods every day
- Balancing food intake and physical activity
- Eating more fruits, vegetables and whole grain products
- Choosing foods that are low in fat, saturated fat, and cholesterol and do not contain trans fat
- Choosing foods and beverages with little added sugars
- Eating more calcium-rich foods
- Preparing healthy meals and snacks
- Risks of unhealthy weight control practices
- Accepting body size differences
- Food safety
- Importance of water consumption
- Importance of eating breakfast
- Making healthy choices when eating at restaurants

- Eating disorders
- The Dietary Guidelines for Americans
- Reducing sodium intake
- Social influences on healthy eating, including media, family, peers and culture
- How to find valid information or services related to nutrition and dietary behavior
- How to develop a plan and track progress toward achieving a personal goal to eat healthfully
- Resisting peer pressure related to unhealthy dietary behavior
- Influencing, supporting, or advocating for others' healthy dietary behavior

Food and Beverage Marketing in Schools

The School is committed to providing a school environment that ensures opportunities for all students to practice healthy eating and physical activity behaviors throughout the school day while minimizing commercial distractions. The school strives to teach students how to make informed choices about nutrition, health and physical activity. These efforts will be weakened if students are subjected to advertising on School property that contains messages inconsistent with the health information the school is imparting through nutrition education and health promotion efforts. It is the intent of the school to protect and promote student's health by permitting advertising and marketing for only those foods and beverages that are permitted to be sold on the school campus, consistent with the School's wellness policy.

Any foods and beverages marketed or promoted to students on the school campus* during the school day* will meet or exceed the USDA Smart Snacks in School nutrition standards such that only those foods that comply with or exceed those nutrition standards are permitted to be marketed or promoted to students.

Food and beverage marketing is defined as advertising and other promotions in schools. Food and beverage marketing often includes an oral, written, or graphic statements made for the purpose of promoting the sale of a food or beverage product made by the producer, manufacturer, seller or any other entity with a commercial interest in the product. This term includes, but is not limited to the following:

- Brand names, trademarks, logos or tags, except when placed on a physically present food or beverage product or its container.
- Displays, such as on vending machine exteriors
- Corporate brand, logo, name or trademark on school equipment, such as marquees, message boards, scoreboards or backboards (Note: immediate replacement of these items are not required; however, districts will replace or

update scoreboards or other durable equipment when existing contracts are up for renewal or to the extent that is financially possible over time so that items are in compliance with the marketing policy.)

- Corporate brand, logo, name or trademark on cups used for beverage dispensing, menu boards, coolers, trash cans and other food service equipment; as well as on posters, book covers, pupil assignment books or school supplies displayed, distributed, offered or sold by the School.
- Advertisements in school publications or school mailings.
- Free product samples, taste tests or coupons of a product, or free samples displaying advertising of a product.

As the school nutrition services/Athletics Department/PTA/PTO reviews existing contracts and considers new contracts, equipment and product purchasing (and replacement) decisions should reflect the applicable marketing guidelines established by the School wellness policy.

IV. Physical Activity

Children and adolescents should participate in at least 60 minutes of physical activity every day. A substantial percentage of students' physical activity can be provided through a comprehensive school physical activity program (CSPAP). A CSPAP reflects strong coordination and synergy across all of the components: quality physical education as the foundation; physical activity before, during and after school; staff involvement and family and community engagement; and the district is committed to providing these opportunities. Schools will ensure that these varied physical activity opportunities are in addition to, and not as a substitute for, physical education (addressed in "Physical Education" subsection).

Physical activity during the school day (including but not limited to recess, classroom physical activity breaks or physical education) will not be withheld as punishment for any reason. This does not include participation on sports teams that have specific academic requirements. The school will provide teachers and other school staff with a list of ideas for alternative ways to discipline students.

To the extent practicable, the School will ensure that its grounds and facilities are safe and that equipment is available to students to be active. The School will conduct necessary inspections and repairs.

Physical Education

The School will provide students with physical education, using an age-appropriate,

sequential physical education curriculum consistent with national and state standards for physical education. The physical education curriculum will promote the benefits of a physically active lifestyle and will help students develop skills to engage in lifelong healthy habits, as well as incorporate essential health education concepts (discussed in the “Essential Physical Activity Topics in Health Education” subsection). The curriculum will support the essential components of physical education.

All students will be provided equal opportunity to participate in physical education classes. The School will make appropriate accommodations to allow for equitable participation for all students and will adapt physical education classes and equipment as necessary.

All elementary students in each grade will receive physical education for at least 60-135 minutes per week throughout the school year. SMART (*Stimulating Maturity through Accelerated Readiness Training*) curriculum will be taught daily to Preschool and Pre-Kindergarten. Twice a week to Kindergarten and once a week to 1st grade students. All St. Dominic School middle school students are required to take the equivalent of one academic year of physical education.

The physical education program will promote student physical fitness through individualized fitness and activity assessments.

- Students will be moderately to vigorously active for at least 50% of class time during most or all physical education class sessions (meets Healthy Schools Program Silver-level criteria).
- The Physical education teacher may participate in at least a once a year professional development in education (meets Healthy Schools Program Silver-level criteria).
- Waivers, exemptions, or substitutions for physical education classes are not granted.

Essential Physical Activity Topics in Health Education

Health education will be required in all grades. The School will include in the health education curriculum a minimum of 12 the following essential topics on physical activity:

- The physical, psychological, or social benefits of physical activity.
- How physical activity can contribute to a healthy weight.
- How physical activity can contribute to the academic learning process.
- How an inactive lifestyle contributes to chronic disease.
- Health-related fitness, that is, cardiovascular endurance, muscular endurance, muscular strength, flexibility, and body composition.
- Differences between physical activity, exercise and fitness.

- Phases of an exercise session, that is, warm up, workout and cool down.
- Overcoming barriers to physical activity.
- Decreasing sedentary activities, such as TV watching.
- Opportunities for physical activity in the community.
- Preventing injury during physical activity.
- Weather-related safety, for example, avoiding heat stroke, hypothermia and sunburn while being physically active.
- How much physical activity is enough, that is, determining frequency, intensity, time and type of physical activity.
- Developing an individualized physical activity and fitness plan.
- Monitoring progress toward reaching goals in an individualized physical activity plan.
- Dangers of using performance-enhancing drugs.
- Social influences on physical activity, including media, family, peers and culture.
- How to find valid information or services related to physical activity and fitness.
- How to influence, support, or advocate for others to engage in physical activity.
- How to resist peer pressure that discourages physical activity.

Recess Elementary

Our school will offer at least 20 minutes of recess on all days during the school year (This policy may be waived on early dismissal or late arrival days). If recess is offered before lunch, schools will have appropriate hand-washing facilities and/or hand-sanitizing mechanisms located just inside/outside the cafeteria to ensure proper hygiene prior to eating and students are required to use these mechanisms before eating. Hand-washing time, as well as time to put away coats/hats/gloves, will be built into the recess transition period/time frame before students enter the cafeteria.

Outdoor recess will be offered when weather is feasible for outdoor play. Students will be allowed outside for recess except when outdoor temperature is below zero degrees Fahrenheit, or at the discretion of the building administrator based on his/her best judgment of safety conditions.

In the event that the school must conduct indoor recess, teachers and staff will follow the indoor recess guidelines that promote physical activity for students, to the extent practicable.

Recess will complement, not substitute, physical education class. Recess monitors or teachers will encourage students to be active, and will serve as role models by

being physically active alongside the students whenever feasible.

Classroom Physical Activity Breaks (Elementary and Secondary)

The School recognizes that students are more attentive and ready to learn if provided with periodic breaks when they can be physically active or stretch. Thus, students will be offered periodic opportunities to be active or to stretch throughout the day on all or most days during a typical school week. The School recommends teachers provide short (3-5-minute) physical activity breaks to students during and between classroom time at least three days per week. These physical activity breaks will complement, not substitute, for physical education class, recess, and class transition periods.

The School will provide resources and links to resources, tools, and technology with ideas for classroom physical activity breaks. Resources and ideas are available through USDA and the Alliance for a Healthier Generation.

Active Academics

Teachers will incorporate movement and kinesthetic learning approaches into “core” subject instruction when possible (e.g., science, math, language arts, social studies and others) and do their part to limit sedentary behavior during the school day.

The School will support classroom teachers incorporating physical activity and employing kinesthetic learning approaches into core subjects by providing annual professional development opportunities and resources, including information on leading activities, activity options, as well as making available background material on the connections between learning and movement.

Teachers will serve as role models by being physically active alongside the students whenever feasible.

Before and After School Activities

The School offers opportunities for students to participate in physical activity either before and/or after the school day (or both) through a variety of methods. The District will encourage students to be physically active before and after school by offering intramural and interscholastic sports such as basketball and spirit squad.

Active Transport

The School will support active transport to and from school, such as walking or

biking. The District will encourage this behavior by engaging in six or more of the activities below; including but not limited to:

- Designate safe or preferred routes to school.
- Instruction on walking/bicycling safety provided to students.
- Promote safe routes program to students, staff, and parents via newsletters, websites, local newspaper.
- Use crossing guards.
- Use walking school buses.
- Document the number of children walking and or biking to and from school
- Create and distribute maps of school environments (e.g., sidewalks, crosswalks, roads, pathways, bike racks, etc.).

V. Other Activities that Support Student Wellness

Our school will integrate wellness activities across the entire school setting, not just in the cafeteria, other food and beverage venues and physical activity facilities. Our school will coordinate and integrate other initiatives related to physical activity, physical education, nutrition and other wellness components so all efforts are complementary, not duplicative, and work towards the same set of goals and objectives promoting student well-being, optimal development and strong educational outcomes. The school will also work to incorporate and utilize physical incentives more often with events and activities.

Classes will coordinate content across curricular areas that promote student health, such as teaching nutrition concepts in mathematics, with consultation provided by either the school or the School's curriculum experts.

All efforts related to obtaining federal, state or association recognition for efforts, or grants/funding opportunities for healthy school environments will be coordinated with and complementary of the wellness policy, including but not limited to ensuring the involvement of the SWC.

All school-sponsored events will adhere to the wellness policy guidelines. All school-sponsored wellness events will include physical activity and healthy eating opportunities when appropriate.

Community Partnerships

Our school will develop relationships with community partners (e.g., hospitals, universities/colleges, local businesses, SNAP-Ed providers and coordinators, etc.) in support of this wellness policy's implementation. Existing and new community partnerships and sponsorships will be evaluated to ensure that they are consistent with the wellness policy and its goals.

Community Health Promotion and Health Engagement

Our school will promote to parents/caregivers, families, and the general community the benefits of and approaches for healthy eating and physical activity throughout the school year. Families will be informed and invited to participate in school-sponsored activities and will receive information about health promotion efforts.

As described in the “Community Involvement, Outreach, and Communications” subsection, the School will use electronic mechanisms (e.g., email or displaying notices on the district’s website), as well as non electronic mechanisms, (e.g., newsletters, presentations to parents or sending information home to parents), to ensure that all families are actively notified of opportunities to participate in school-sponsored activities and receive information about health promotion efforts.

Staff Wellness and Healthy Promotion

The SWC will have a staff wellness subcommittee that focuses on staff wellness issues, identifies and disseminates wellness resources and performs other functions that support staff wellness. The subcommittee leader’s name is Shawn Dudley.

Our school will implement strategies to support staff in actively promoting and modeling healthy eating and physical activity behaviors. Examples of strategies schools will use, as well as specific actions staff members can take, include before school campus walking, after school campus walking, weekly minutes of physical activity contests, and healthy snack offered at faculty meetings. Our staff promotes staff member participation in health promotion programs and will support programs for staff members on healthy eating/weight management that are accessible and free or low-cost.

Professional Learning

When feasible, our school will offer annual professional learning opportunities and resources for staff to increase knowledge and skills about promoting healthy behaviors in the classroom and school (e.g., increasing the use of kinesthetic teaching approaches or incorporating nutrition lessons into math class). Professional learning will help school staff understand the connections between academics and health and the ways in which health and wellness are integrated into ongoing district reform or academic improvement plans/efforts.

Glossary

Extended School Day – the time during, before and after school that includes activities such as clubs, intramural sports, band and choir practice, drama rehearsals and more.

School Campus - areas that are owned or leased by the school and used at any time for school-related activities, including on the outside of the school building, school buses or other vehicles used to transport students, athletic fields and stadiums (e.g., on scoreboards, coolers, cups, and water bottles), or parking lots.

School Day – the time between midnight the night before to 30 minutes after the end of the instructional day.

Triennial – recurring every three years.

We know celebrating birthdays at school is a fun day for children. Instead of getting rid of the bring a treat tradition we have a list of approved treats that are fun, and a healthier option. Please take the time to look this over so we can continue allowing our students to have this tradition.

Birthday Celebration Treat Ideas:

- Fresh Fruit
- Fruit Cups in 100% juice
- Unsweetened Applesauce
- Nestle Outshine Fruit Bars
- 100% Fruit Juice
- Jonny Pops
- Individually wrapped Rice Krispie Treats
- Already popped popcorn (brands like Skinny Pop & Boom Chicka for example)
- Mott's Fruit Snacks
- Welch's Fruit Snacks
- Whole Grain Cheez Its
- Pretzels
- Whole Grain Goldfish
- Baked Potato Chips
- Whole Grain Graham Crackers
- Teddy Grahams
- Whole Grain Bars (Ex:Nutri Grain & Chewy Granola Bar)
- Fat Free or Low Fat Pudding
- Erasers
- Stickers
- Play dough
- Pencils
- Bracelets
- Talk to your teacher about organizing an extra recess that you help supervise.

Smart Snack Beverages

Our School is happy to provide you with a snack cart full of healthy options. However, we understand if this option does not work for your family. Here is a list of ideas of snacks you can send with your child to school if you so choose.

Snack From Home Suggestions:

- 100% fruit juice with no added sugar
- Fat-free or low fat milk
- Fruit smoothies (made with frozen fruit with no added sugar and fat-free or low fat yogurt)
- 100% fruit juice slushes with no added sugar
- Fresh fruit – trays, salads or kabobs
- Fresh vegetables – trays, salads or kabobs
- Fat-free or low fat yogurt (alone or as dip for fruits or vegetables)
- Yogurt parfaits (fat-free or low fat yogurt, fruit and whole grain cereal or granola as topping)
- Canned fruit or fruit cups (in water, 100% fruit juice or light syrup)
- Frozen fruit or fruit cups (in water, 100% fruit juice or light syrup)
- Frosty fruits – freeze your own fruit (frozen grapes make a great summer treat!)
- Dried fruit with no added sugar
- Nut or seed butter (serve with fruit or whole grain crackers)
- Nuts or seeds
- Trail mix made of nuts or seeds and dried fruit with no added sugar
- Whole grain crackers Low-fat cheese (serve with fruit or whole grain crackers)
