Forensics: Solving Crime with Science!

Mon, Nov 11–Dec 9 (no class 11/25) \$46

We're going to become a team of detectives working together to gather evidence and apply real-life science and technology to solve two mysterious crimes! We will get to learn about optical tools such as magnification, UV lights, and autostereograms (3D images). Each young detective gets to keep own pair of 3D glasses and a real magnifying glass!

Eats: Creating Christmas Confections!

Thurs, Nov 14–Dec 12 (no class 11/28) \$52

Won't it be great to have your little chefs and bakers ready to help out with the holiday treats this year? We'll make two treats using Oreos in unexpected ways; an edible reindeer; tasty wreaths; colorful cookies, and more! Two recipes will go home each week, hopefully with a few samples, too! All recipes are nut-free. *Please list all allergies on the form.*

Sewing & Crafts: Hooray for Holidays!

Tues, Nov 12–Dec 10 (no class 11/26) \$52

We will learn to use the school's new set of sewing machines, do a bit of hand sewing on a mini-stuffie, make a needle art key fob, and a few non-sewing holiday crafts, too! This is a great way for your crafty kiddo to make gifts to share and holiday decorations for your home.

Strategy Games: Stacks of Fun!

Fri, Nov 15–Dec 13 (no class 11/29) \$46

We'll try stacking cats, dogs, (miniature) chairs and ladders sky-high! There will be new card games to play, and games to take home. This is a great way to end the week – challenging our minds while developing a great sense of sportsmanship and team spirit with our games.
