### **Peace of Mind and Nurtured Heart**

Technology and Social Media

The use of social media and technology is one of the most popular areas of concern for parents of children and adolescents. How much is too much? How do we keep our kids safe online? What about the constant social comparison? This session will focus on the latest research on use of social media and technology. It will also help us understand the relationship between brain development and what drives the need to feel connected online as well as those areas of big concern like pornography and algorithms that target adolescent vulnerabilities. Parenting tips will be offered.
